Summary

Software Engineer with over 2+ years of proven experience on application development with major expertise in JavaScript, Node.JS, MongoDB, HTML, CSS, Linux ,Python, database knowledge, Object-Oriented Concepts, data structures, algorithms,debugging, root cause analysis and Back-end Development. Collaborated with the team of 3-4 engineers in order to deliver multiple projects and inflated automation gain by 10-20% in a single quarter. Demonstrated history of ability to switch between technologies, problem-solving skills and analytical skills.

Work Experience

SOFTWARE DEVELOPER   **January,2020 to PRESENT**

Ericsson India Global Services Pvt. Ltd, BANGALORE

Evolved Audit Bot

- Generated multiple audit reports using **Python and its libraries** for various vendors like Bharti, Ericsson, Huawei, Nokia that lessened manual efforts, saved time and inflated **automation gain from 30% to 65%**
- Developed dashboard for multiple servers with little **to no supervision Single handedly using Python,HTML,CSS**
- Integrated ISF API with bots that captured the automation time gain 7**k per hour**
- Implemented **Linux** server setup from scratch and accomplished code deployment on **GIT** openAlm
- Demonstrated **Python Scripting** skills to develop and modify automation strategies and simplifying business process
- Optimized the code reducing the runtime from 12 hrs. to 7 hrs through **MongoDB** query **maximizing efficiency**

GRADUATE ENGINEER TRAINEE   **July,2019 to January 2020**

Ericsson India Global Services Pvt. Ltd, BANGALORE

DT-RCA(Drive Test Root Cause Analysis)

- Designed automated reports **using Node.JS, Google maps APIs** which provided KPI analysis for 3G and 4G at **the rate of 100 reports per day,**
  saved **120K hours and 12.4 MSEK** per quarter
- Modified existing software to correct coding errors, upgrade design **user Interface(UI)** and improve overall performance
- Collaborated with project managers, developers and Subject Matter Experts to take specific business requirements, **resolve technical issues, outpaced customer satisfaction ratings**
- Stabilized prebot code written in **JAVA** through End To End(E2E) manual testing that increased automation **gain from 12% to 20%**
- Revamped technological issues for project, increasing **customer satisfaction ratings** that required **Javascript** knowledge

PROJECTS

LOGIN-SIGNUP PAGE

- Developed Login ,SignUp Page using **HTML,CSS, the purpose was to enhance my front-end development knowledge**
- Link to page https://priyanka24th.github.io/LOGIN_PAGE_HTML_CSS/

PORTFOLIO

- Developed Portfolio Page using **HTML,CSS,CSS3 the purpose was to enhance my front-end development knowledge**
- Link to page https://priyanka24th.github.io/Portfolio/

SKILLS

- Node.JS
- HTML
- Jest(UI Testing)
- MySQL
- Manual Testing
- Visual Studio Code
- Java Script
- Express
- AJAX
- MongoDB
- Python
- Java(Basic)
- React
- CSS
- JSON
- RESTful APIs
- NumPy
- Debugging
- GIT
- C
- Linux
- Pandas

Education

- Bachelor of Engineering: **INFORMATION TECHNOLOGY- June,2019**
  BIRLA INSTITUTE OF TECHNOLOGY,MESRA(8.03 CGPA)

Achievements

- Awarded with Rockstar Power award for Q2 2021 by Ericsson Global India Pvt Ltd.

Certifications

- Mar 2020 — Dec 2020 JavaScript Bootcamp at Udemy(https://www.udemy.com/certificate/UC-RVMSPNRO/)
- Mar 2020 — Dec 2020 MongoDb Developers course at Udemy(https://www.udemy.com/certificate/UC-07d37a95-ba2a-4b30-811e-5927e9913362/)
